

Solid, reliable, lightweight

Used for sampling with flow rates from 1-3 litres/min with an industry standard 0.8 micron filter, the robust Airbox Personal is made from a solid, epoxy powder coated aluminium construction.

It has an adjustable flow rate using a trimmer to set the potentiometer to the required sampling rate and a display timer to show the total run time with a manual reset button.

Run time is 8 hours.

Specifications:-

Flow Range: 1 -3 litres / min **Flow Control:** Variable potentiometer **Battery Pack:** (7.2V 4/5A (x6) Pack NiMH 1.8Ah -
Charge Time: Approx 3 hours **Duration:** 8 Hours **Display:** Total run time **Material:** Aluminium **Coating:** Epoxy resin
Dimensions: H4.5cm x W 8.0cm x D10.2cm **Weight:** 500g **Supplied with charger and warranty***
